

Rooftop photovoltaic panels for solar energy

Overview

Roof-mounted solar panels are photovoltaic systems installed on residential rooftops to capture sunlight and convert it into usable electricity. Solar Costs Have Reached Historic Lows: Average residential solar costs have dropped to \$3.30 per watt in 2025, representing a 60% decrease from 2010 levels. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+. Solar projects are making it easier for Americans to choose solar energy to power their homes. Many areas offer attractive Renewable Energy Credits (RECs) that, when coupled with federal and local incentives, can make rooftop solar an attractive financial choice that is also good for the environment. Use. Investing in solar energy offers multiple advantages, from reducing electricity bills to contributing to environmental sustainability.
