

# Rooftop solar steel structure support

## Overview

---

Steel structure for pv panel supports heavy pv loads and adapts to rooftop, ground, or floating setups. This flexibility and adaptability ensure compatibility with different panel types and meet the diverse needs of modern photovoltaic projects. NBG Solar Structures provide custom-engineered elevated steel structures, designed to support solar panels used in all types of applications. These solar support structures are an optimal solution for parking garages, solar farms, carports, canopies, charging stations, ground mounts, and roof. These systems — whose importance is often overshadowed by the solar panels they support — are critical to making sure panels placed on rooftops remain stable, functional, and long-lasting.

## Rooftop solar steel structure support

---

### Steel Solar Panel Structures , Nucor Buildings Group

NBG Solar Structures provide custom-engineered elevated steel structures, designed to support solar panels used in all types of applications. These solar support structures are an optimal solution for ...
