

San Diego Wind Inverter Manufacturer

Overview

Founded in 2010, EPC Power is headquartered in San Diego County, California and has become the premier utility-scale inverter manufacturer in North America. The company continues to expand rapidly, with major multinational corporations brand-labeling its products. We design, manufacture, and deliver US-made inverters around the world -. We design and manufacture grid forming bi-direction inverters and DCDC converters for solar, wind, flywheel, automotive, alternative fueled generators and battery storage. Americas is a fully integrated, utility-scale solar, wind, and battery energy storage developer and service provider. Reimagined low-carbon solutions. We're committed to providing future generations with the means to power their lives in the most economic, environmental, and socially responsible ways possible.
