

# Semi-solid-state portable power supply

## Overview

---

Semi-solid-state powerbanks offer higher energy density, lighter weight, and safer performance than traditional lithium models. With longer lifespan and stable output, they are emerging as the next-generation portable charging solution for travel and work. [Dabb brand to use industry-leading EV semi-solid state LiFePO4 batteries and the highest fireproof rating UL94 V0 outer shell the thermal runaway is 4X higher than Li-NMC battery which is more stable in hotter temperature, the ideal. This power station features 12 versatile output ports, suitable for a wide range of environments. Two DBS1300 units paired with four DBS1700B batteries (2 DBS1300 + 4 DBS1700B) provide a total storage capacity of up to 9,460Wh. Equipped with advanced automotive-grade semi-solid lithium iron. Semi-solid-state batteries tend to hold capacity longer, even after hundreds of cycles. For anyone who depends on a powerbank daily, this translates into fewer replacements and better long-term value. A single SuperBase V can provide up to.
