

# Soft pack energy storage lithium battery

Standard 20ft containers

Standard 40ft containers

## Overview

---

Soft-pack lithium batteries are a type of rechargeable energy storage device known for their flexibility, lightweight design, and safety features. They are increasingly used across various industries, from consumer electronics to electric vehicles. The Global Soft Pack Lithium Battery Packaging Material Market was valued at USD 1.347 Billion in 2025 and is projected to reach USD 3.2% during the forecast period (2026–2034). Unlike traditional rigid batteries, soft-pack ENOV High-Energy drone batteries power industrial and commercial drones. Delivering 220–320 Wh/kg energy density, they enable long flight times (30+ mins) and support fast charging (2C). Perfect for aerial photography, surveillance, and delivery drones.
