

Solar Energy Storage Skylight

Overview

This innovation combines daylight harvesting with solar energy storage, giving you a bright home during the day and clean, solar-powered LED light at night. Refresh and revitalize spaces with the power of the sun. The discreet solar panel captures available daylight to power the skylight, and the built-in rain sensor. A skylight, often referred to as a rooflight, is a structure or window designed to allow light to enter, typically made from transparent or translucent glass. It serves as part or all of a building's roof, providing both daylight and ventilation. In this. Are you looking for a sustainable way to bring natural light into your home while cutting down electricity bills?

The answer lies in a skylight with solar panels.

Solar Energy Storage Skylight

Transforming Residential Builds with Solar-Powered Skylights
