

# Solar Energy Storage in Afghanistan

## Overview

---

Afghanistan's Ministry of Energy finally released its Solar Energy Framework in January 2025, addressing crucial issues like: The framework could boost annual PV installations by 150% if properly implemented. But let's be real - enforcement remains shaky in conflict-affected. Arif Aga, director at renewable energy engineering consultant SgurrEnergy. This article explores how solar-storage integration addresses energy deficits while aligning with global renewable trends. But here's the twist: Afghanistan gets over 300 sunny days a year. These systems combine 100kW photovoltaic arrays with 250kWh battery banks, providing 24/7 power for \$0.
