

Solar Power Generation National Service

Overview

Find and download resource map images and data for North America, the contiguous United States, Canada, Mexico, and Central America. Developers added 12 gigawatts (GW) of new utility-scale solar electric generating capacity in the United States during the first half of 2025, and they plan to add another 21 GW in the second half of the year, according to our latest survey of electric generating capacity changes. If those plans. Changes to net metering have recently been implemented in Massachusetts Our interactive sample bills feature explanations of terminology and charges found on our solar bills. Moving?

Are you moving into or out of a property that has solar?

Visit our Distributed Generation website to learn the steps. Explore solar resource data via our online geospatial tools and downloadable maps and data sets. National Laboratory of the Rockies (NLR) bridges research with real-world applications to advance energy technologies that lower costs, boost the economy, strengthen security, and ensure abundant energy.

Solar Power Generation National Service

China's solar power capacity to surpass coal in 2026

Over 400 GW of new generation capacity is expected in 2026 China's installed solar power capacity is set to surpass coal for the first time in 2026. According to the 2025-2026 National Power
