

Solar battery cabinet lithium battery pack series discharge

Overview

DC usable energy, test conditions: 90% DOD, 0.3C charge and discharge at 25°C. Output current is affected by battery temperature and SOC. Battery cabinet that includes Lithium-ion batteries, Battery Management System (BMS), switchgear, power supply, and communication interface. Schneider. NOTE: The battery temperature must return to ± 3 °C / ± 5 °F of the room temperature before a new discharge at maximum continuous discharge power. Designed for use in a climate controlled environment, it regulates temperature and provides active smoke monitoring with an alarm system. The ideal upgrade on CellBlock FCS cabinets. The Vertiv™ EnergyCore Li5 and Li7 battery systems deliver high-density, lithium-ion energy storage designed for modern data centers.

Solar battery cabinet lithium battery pack series discharge

L3 208V Datasheet (EN)

Battery will operate at a maximum 1C charge/discharge up to 2000m, above 2000m maximum output is derated to 0.8C, contact Sol-Ark for details. EOL (End of Life) 70% retained capacity. See L3 Series ...
