

# Solar container battery structure design

## CONTAINER TYPE ENERGY STORAGE SYSTEM

Energy storage system

FC RoHS CE 

## Overview

---

The MW-class container energy storage system includes key equipment such as energy conversion system and control system. These include battery cells, typically lithium-ion, and inverters that transform direct current (DC) to alternating current (AC). There are multiple control systems, including battery management, power conversion, fire safety, and. of a containerized energy storage system. Based on extensive project experience, we have identified six key capabilities that a high-performance battery container must deliver 1. Li-ion = lithium-ion, Na-S = sodium-sulfur, Ni-CD = nickel-cadmium, Ni-MH = nickel-metal.

## Solar container battery structure design
