

Solar energy 110mw

Overview

As of 2023, it is operated by its new owner, Vinci SA, and in a new contract with NV Energy, it now supplies solar energy at night only, drawing on thermal energy stored each day. Country United States Location, Nye County, Nevada Status Post-bankruptcy reorganization, restart Construction began 2011 Overview The Crescent Dunes Solar Energy Project is a project with an installed capacity of 110 (MW) and 1.1 gigawatt-hours of energy storage located near, about 190 miles (310 km) northw. In late September 2011 Tonopah Solar Energy received a \$737 million from the (DOE) and the right to build on public land. The capital stack included \$1. The project's was, which carried out the engineering design, procured the equipment and materials necessary, and then constructed and delivered the facility to Tonopah Solar Energy. Th. Crescent Dunes began operation in September 2015, but went off-line in October 2016 due to a leak in a molten salt tank. It returned to operation in July 2017. While its average monthly production was expected t.
