

# Solar modules are good or not

## Overview

---

The pros of using solar panels include a lower carbon footprint, lower electric bills, potentially higher home value and tax credits. With current tax credits and incentives, the average payback period for solar panels is between six and 10 years. In other words, you can recoup the money. Can solar panels significantly reduce your energy bills?

Are they worth the investment?

We explore solar panels' pros and cons to determine whether they're a good choice for your home energy needs this spring. Solar panels have a lot of benefits, but there are also downsides. Still, they don't always make financial sense for everyone. Going solar now will be more.
