

# Solar panels can be extended

## Overview

---

If you install solar energy equipment in your home anytime in the year of 2022, through the end of 2032, you're entitled to a credit on your federal taxes equal to 30% of the cost of eligible expenses. There is no upper dollar limit on those expenses. Installing solar panels can provide a host of benefits boosting reliance on renewable energy, lowering utility costs, and even improving the value of a home. However, one advantage that is often overlooked is the ability to earn solar tax credit from the federal government for operating solar. July 2025 Update: Congress is moving to terminate the 30% solar tax credit early through the "One Big Beautiful Bill. " If signed into law as currently written, homeowners will need to install solar and/or battery storage by Decemto qualify for this tax credit before it is gone. This solar energy tax credit was recently increased with a new plan to be phased out over the next 10 years.
