

Solar panels for Bhutan solar project

Positive

Back

Overview

The new solar power plant is Bhutan's largest grid-connected solar project to date. It is spread across 44 acres of land and fitted with around 26,500 solar panels. Once fully operational, it will have the capacity to generate up to 22.38 megawatt-peak (MWp) of electricity. Bhutan inaugurated its first-ever utility-scale solar photovoltaic (PV) power plant on July 19 in Yongtru village, Sephu Gewog (Village Block), in Wangdue Phodrang in central part of Bhutan which is about five hours journey from the capital, Thimphu. Taking a major step forward in the country's. Bhutan has launched its National Solar Energy Roadmap to diversify its energy sources and bolster energy security amid rising electricity demand. About 60 De-suups have been actively involved in this six-month long project and have gained practical knowledge of. This initiative is part of IPCL's larger plan to add 1.
