

# Solar panels roof fence

## Overview

---

Unlike traditional rooftop systems, a solar panel fence uses bifacial solar panels installed along your property line to capture sunlight on both sides, delivering reliable energy production without roof restrictions. Yes, you can absolutely put solar panels on fences! In fact, fence-mounted solar panels have emerged as a popular and practical solution for homeowners and businesses alike. These fences blend traditional fencing with solar panel power. They work, no matter your property's layout.
