

# Solar photovoltaic bracket is considered illegal

## Overview

---

Metallic structural support systems such as carport canopies or similar structures that may serve as a path for ground-fault current does not automatically mean that the installation of such structural support system is considered electrical work. Answer: Generally, no. Technically, no state outlaws or bans solar panels; quite the opposite. While federal guidelines provide a baseline, local jurisdictions often implement additional requirements affecting everything from permit costs to HOA. Unless specifically exempt in Minnesota Statute Chapter 326B, all electrical work installed in Minnesota is required to be installed in accordance with all applicable electrical licensing and inspection requirements. EL-4) Are there any specific licensing requirements, other than an electrical. Solar access laws are designed to protect the rights of homeowners to harness solar energy. While net metering is regulated at the state level, federal energy. Navigating energy policy regulations for solar installations varies dramatically across America's 50 states, directly impacting your project's timeline, cost, and return on investment. California leads with mandatory solar requirements for new construction, while states like Texas emphasize.
