

# Solar power generation and energy storage project in Belgium

## Overview

---

The project is developed in Vise, Liege province, in partnership with Belgian energy company Luminus. The facility is designed to stabilise Belgium's electricity grid, support the further integration of renewable energy capacity, and help meet the national and EU. Europe's largest grid battery project has completed the first phase of 400 MWh energy production, marking a significant milestone in Belgium's energy independence goals. Tractebel is Owner's Engineer on this landmark project. Green Turtle, situated on the Rotem industrial site in Belgium's northwestern Limburg province, was originally planned. The storage project with an end capacity of 200 MW/800 MWh uses 320 units of Sungrow's liquid-cooled ESS PowerTitan. The second and final phase of the Vilvoorde project is set to connect to the grid by late 2025.
