

Solar power generation looking for land

Overview

Solar developers are contacting farmers and landowners to secure long-term land leases; the amount of land desirable for a lease typically ranges from 10 to 30 acres. Visit [this link](#) to learn more about specific considerations, and the potential impacts of solar land leases. This is how solar land leasing works with Genie Solar: The area's electrical grid must have. AES seeks opportunities to deliver added value through our best practices in project development to protect the land for future generations. Allocating a portion of your land to lease for an energy project opens up a diversified and dependable income stream.
