

Solar power generation system sold to Guyana

48V 100Ah

Overview

In 2022, the National Assembly approved the establishment of the Guyana Utility Scale Solar Programme (GUYSOL), which aims to develop 33 MW of solar power capacity in the country. In addition to the GUYSOL program, the government is also working on other renewable energy projects. However, the Energy sector is poised for significant transformation due to Guyana re-committing itself to the development of its indigenous renewable energy resources and to pursue 100% renewable energy in electricity generation in its Green State Development Strategy. According to the Energy. Guyana Power and Light Inc. The new facility promises cleaner, more reliable. In a decisive move towards sustainable development, the Government of Guyana has launched a state-of-the-art solar farm on Wakenaam Island, Region Three—an initiative poised to redefine its energy landscape and catalyze economic growth.

Solar power generation system sold to Guyana

Guyana Utility Scale Solar Photovoltaic Program (Guysol)

The general objective of the program is to support the diversification of Guyana's energymatrix towards the use of climate-resilient renewable energy sources in the electricity ...
