

Solar power with grid backup in Jakarta

Overview

The new initiative features plans for 1 MW solar minigrids tied with 4 MWh of accompanying battery energy storage, to be deployed across 80,000 villages, alongside 20 GW of centralised solar power plants. Indonesia, an archipelago forming over 17,000 islands, is rich in natural resources and has as much solar potential as it does challenges. In recent years, the solar power plant generates electricity at a lower rate per kWh than electricity from the national grid. Through this scheme, companies have the opportunity to save up to 30-40 percent on energy costs, depending on the system capacity and daily electricity consumption patterns. The solar plant. We are first and foremost Renewable Energy Power System Technical Specialists - our design and engineering team works closely with our customers to optimize every aspect of the power systems we design to ensure long-term reliability and real value solutions. Solar Power Indonesia partners with. Imelda Tanoto, Managing Director at RGE (right) and Helle Kristoffersen, President Asia and Member of the Executive Committee at TotalEnergies (left) announced a Co-Investment Agreement between RGE and TotalEnergies in the presence of Indonesian President Prabowo Subianto and French President.
