

# Solar rooftop power generation in France

## Overview

---

Rooftop solar PV generated nearly twice the output of utility-scale solar throughout November 2025, maintaining a 1. France has revised down its solar PV target by 2035 from 100GW to 90GW in its latest Multiannual Energy Programme (PPE3). France remains one of the top performing countries when it comes to the development of Rooftop solar policy and practices, but deliverables still need to be achieved. The. The largest single-unit rooftop solar power plant in Europe, developed by French independent power producer Urbasolar, is under construction on the Delta 3 multimodal logistics platform in Dourges, in France's Hauts-de-France region. Construction has started on what Urbasolar says will be France's. A rooftop photovoltaic system is a solar energy installation mounted on residential, commercial, or industrial roofs, converting sunlight into electricity. In France, rooftop PV is a key driver of the energy transition, with: Manufacturing plants, warehouses, logistics centers, and large-scale. Find here the data on electricity generation in France, presented either in aggregate or in detail by generation type: nuclear, conventional thermal, hydro, solar, wind and renewable thermal. In 2023, the PV energy capacity in France amounted to approximately 20. 5 GW of decentralized PV and 1.
