

Solar support leg drag

Overview

In short, adjustable legs are the supportive pillars for ground-mounted or flat-roof solar arrays. Unlike fixed mounts, these legs have a mechanical adjustment mechanism—often a series of holes or a threaded piston system—that allows you to change the angle, or tilt, of your entire. Check each product page for other buying options. Price and other details may vary based on product size and color. We're proud to announce that Sollega has been featured on the cover of SolarBuilder Magazine's Q1 2025 edition! The simple solar racking solutions for flat roof or ground mount PV installations Not Convinced?

Take a look at some stunning drone footage from our most ambitious projects. Sollega. Minimize the vertical height of your array—to hide an array behind a parapet, for example. Category: Solar Tilt Leg Kits 15" Fixed Tilt leg kit includes South and North tilt legs and all hardware.
