

# Specifications of photovoltaic tile bracket

## Overview

---

Designed to accommodate solar modules of all sizes on sloped tile roofs, these brackets encompass several standard components such as aluminum rail profiles, tile hooks, end/mid clamps, and other solar mounting accessories.

**Clay Tiles:** Traditional ceramic tiles offer excellent weather resistance but require careful handling due to their brittle nature.

**Concrete Tiles:** Heavier than clay alternatives, concrete tiles provide. Brackets for fixing photovoltaic and solar panels on tiles, now also with the new and exclusive BEE33 UNIVERSAL BRACKET. Sun-Age designs and produces the most efficient fixing systems for structures on tile roofs, such as the innovative BEE33 UNIVERSAL BRACKET which saves costs and installation. The L-shaped waterproof hook connects to the wooden board beneath the tiles, without directly damaging the tiles or affecting their waterproofing, thus preventing roof aging and leakage. Pre punched design for guide rail (tolerance < 0.5mm) + snap on pressure block, 15 minutes per person/component, no.

**Glazed tile roof:** Glazed tile roof is suitable for small and medium-sized distributed PV power stations, usually using hook mounting, fixed on the roof structure (such as concrete beams or wooden beams) through stainless steel hooks, and with rails and pressure blocks to fix the PV modules. This system is also compatible with most PV-Modules in the market.

## Specifications of photovoltaic tile bracket
