

# Standard solar Energy Storage System Project

## Overview

---

Solar power is essential, but it is not always available when you need it. Battery Energy Storage Systems (BESS) fill that gap by storing excess solar energy for later use, improving grid stability, reducing costs, and boosting project resilience. RWE continues to expand its renewables portfolio in the U., connecting its first utility-scale battery energy storage system (BESS) to the California Independent System Operator. Department of Energy (DOE) Federal Energy Management Program (FEMP) and others can employ to evaluate performance of deployed BESS or solar photovoltaic (PV) +BESS systems. power grid in 2025 in our latest Preliminary Monthly Electric Generator Inventory report. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at [www.nrel.gov](http://www.nrel.gov). National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices.

---

### Solar, battery storage to lead new U.S. generating capacity additions

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. Solar. In 2024, generators added a record 30 GW of utility ...
