

Station house solar container system

Overview

It is a one-stop integration system and consists of battery module, PCS, PV controller (MPPT) (optional), control system, fire control system, temperature control system and monitoring system. The synergy of the system components can achieve effective charging and discharging. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar energy while at the same time being compact in design, easy to transport and quick to set up. This system is realized through the unique combination of innovative and advanced containers. Many local governments do not have specific laws for container homes. This can lead to delays or denials. Steel is also a. As the global demand for independent energy systems continues to rise, solar container houses are gradually demonstrating their flexible, efficient and intelligent energy supply advantages. Integrating necessary power equipment such as transformers, switchgear, energy storage units and control. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. We have cleverly combined solar panels, shipping containers, and homes to offer an eco-friendly, convenient, and affordable new living solution. Multiple solar power options available to meet daily living needs.
