

Swan Lake Outdoor Solar Power Generation System

Swan Lake Outdoor Solar Power Generation System

SL Energy Storage

The Swan Lake project will be able to store renewable energy for up to 9.5 hours and then release that energy to power about 125,000 homes in the Pacific Northwest.

How the Swan Lake Energy Storage Project Is Reshaping Renewable ...

As the U.S. aims for 100% clean electricity by 2035, projects like Swan Lake are crucial for overcoming

renewable energy's "sunset problem." The facility acts as a grid shock absorber, smoothing out ...

Swan Lake Energy Storage Project

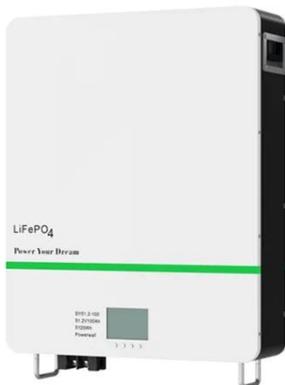

Renewable electricity stored at the facility will be transmitted from the powerhouse along a 32.8-mile-long, 230-kilovolt (kV) aboveground transmission line to interconnect with the Malin Substation.

◆ PRODUCT INFORMATION ◆

-  BATTERY CAPACITY
50kWh~500kWh
-  DC VOLTAGE RANGE
400V~1000V
-  DEGREE OF PROTECTION
IP54
-  OPERATING TEMPERATURE RANGE
-10~50°C

Swan Lake hydroelectric storage system set for Klamath County

Set to be located 11 miles northeast of Klamath Falls, the Swan Lake Energy (SLE) storage project will use two artificial lakes at different elevations to create a closed-loop hydropower

[Learn More](#)

Swan Lake Energy Storage Project finalizes design, nears start of

The Swan Lake Energy Storage Project is a closed-loop pumped storage facility, which generates electricity by circulating water between two reservoirs through an

underground pipe.
