

Tanzania electric vehicle charging

Overview

Tanzania is moving slowly in building the charging infrastructure needed for electric vehicles (EVs), creating a gap in sustainable transportation efforts. As of 2025, the country has only 15 public charging stations, mostly in cities like Dar es Salaam and Arusha, leaving rural. For the vast majority of EV drivers here, home is where the charge is. It's the most convenient and affordable way to keep your battery topped up. Think of it this way: your garage or driveway becomes your own private fuelling station. Most electric cars can be plugged directly into a standard wall. Our mission is to accelerate the adoption and development of electric mobility through collaboration, policy dialogue, knowledge sharing, and private sector participation. Despite the challenges, such as high import taxes and a need for improved infrastructure, the nation is making significant strides in the adoption of EVs. However, awareness is growing, and the government, private investors, and international organizations are working towards establishing a more robust infrastructure. The growth and success of.
