

Tbilisi Backup Power Storage Field

Support Customized Product

Overview

That's the Tbilisi Energy Storage Base – not just another battery farm, but a game-changer in the Caucasus energy landscape. Why?

Because predicting cloud cover directly impacts how much solar energy they'll need to store for evening use. Welcome to the quirky reality of. The Power Supply Bureau reported 14 major outages in 2023 alone - that's 23% higher than pre-pandemic levels. Tbilisi's grid still uses 1960s-era substations that were designed. While lithium technology gets cheaper (prices dropped 9% YoY), proper implementation requires: As a trusted provider for Georgian enterprises since 2015, EK SOLAR combines global technology with local know-how. Lithium-sulfur is a "beyond-Li-ion" battery chemistry attractive for its high energy density coupled with low-cost sulfur. Learn why businesses and communities in Tbilisi are adopting photovoltaic systems to achieve energy independence. Think of it as a giant power bank.

Tbilisi Backup Power Storage Field

Tbilisi's Energy Revolution: How Battery Storage is Transforming ...

"Our storage acts like a shock absorber for the grid," says Nino Beridze, lead engineer at the bureau. "It's bought us 14 minutes of city-wide backup power where we previously had zero."
