

Technical parameters of high-pressure type photovoltaic folding container

Overview

The innovative and mobile solar container contains 200 photovoltaic modules with a maximum nominal output of 134 kWp and, thanks to the lightweight and environmentally friendly aluminum rail system, enables rapid and mobile operation. The 200KW Solarfold Mobile Solar Container from HighJoule features a foldable deployment system using 610W modules. It's a high-yield, portable solution for urgent deployment and high-demand field applications. Compared with the Foldable Photovoltaic Power Generation Cabin, the folding power storage warehouse is equipped with energy storage battery, which is more suitable for long-term emergency. ty for mobility to provide green energy all over the world. Just lay the track,pull it gently,and the solar panels will be. nd is characterized by its flexible and lightweight substructure. The semi-automatic electric drive brings the mobile photovoltaic system over a length of almost 130 meters quickly and without effort into operation with 20-200kWp foldable PV panels and 100-500kWh battery storage.
