Overview

Meet YD/T 1537-2015 outdoor cabinet standard, cabinet protection level: IP65 protection level. power module, battery, refrigeration, fire protection, dynamic environment monitoring and energy management in one. It is suitable for microgrid scenarios such as small-scale commercial and industrial energy storage, photovoltaic diesel storage, and photovoltaic storage and charging. The local converters, energy management monitoring systems, power distribution of local load power, photovoltaic power generation priority is self-generation and self-use, and surplus electricity storage. The outdoor photovoltaic energy cabinet can provide reliable housing for network servers, edge computers, professional equipment, monitoring systems, photovoltaic, and battery systems. It has the characteristics of safe local load, the battery storage may vary slightly. This product shipped local load, the battery types of weather in remote energy storage. The system has been productized, incorporating various components including energy storage batteries, PCS (Power Conversion System), distribution, temperature control, fire prevention, water-immersed door magnets, and monitoring communication. Designed for rapid deployment and flexible.

Technical parameters of waterproof intelligent photovoltaic outdoor

OUTDOOR CABINET

This interface allows them to easily view parameters and data related to direct current (DC), alternating current (AC), and the system. It also provides real-time information about current equipment status and alarms, ...
