

The factory roof is equipped with solar panels

Overview

With advancements in solar technology, today's solar panels are more efficient than ever. High-efficiency panels generate more energy in less space, making them ideal for factory rooftops. Technologies like bifacial panels, trackers, and hybrid inverters further. The industrial solar solutions from Apollo Power leverage flexible, lightweight, high-performance solar panels for market requirements. The flexible solar panels on factory roofs from Apollo Power integrate without problems to different rooftops because they resolve traditional technology. Installing a solar power system on factory rooftops is not just an eco-friendly choice—it's a smart business strategy. In some production countries, even though suppliers are coupled to the grid, electricity supply can be unreliable, costly and powered by fossil fuels. The concept is simple yet brilliant: transform the vast, untapped roof space of factories and industrial buildings into clean energy powerhouses.

The factory roof is equipped with solar panels

Installing rooftop solar in our supply chain

It's a highly automated factory with many machines running on electricity, so switching to renewable energy is key to reducing emissions. With support from GFI, Seduno has installed a 2.5 ...
