

The function of the power module of the solar telecom integrated cabinet

Overview

Solar modules provide reliable, uninterrupted power to telecom cabinets, even during grid failures or in remote locations. Using solar power reduces energy costs and cuts diesel fuel use. The communication base station installs solar panels outdoors, and adds MPPT solar controllers and other equipment in the computer room. The power generated by solar energy is used by the DC load of the base station computer room, and the insufficient power is supplemented by energy storage. th their business needs. Remote diagnosis, performance tracking, and fault alerts through intelligent BMS.
