

The latest progress of energy storage and new energy projects

Overview

In 2025, capacity growth from battery storage could set a record as we expect 18. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. This amount represents an almost 30% increase from 2024 when 48.6 GW of capacity was installed, the largest. UK energy storage company Zenobe has decided to enter the German market and is looking to acquire battery energy storage systems (BESS) of no less than 1 GW/4 GWh by 2030. Canadian Solar Inc (NASDAQ:CSIQ) said on Thursday its e-STORAGE unit will equip two standalone battery energy storage projects. By the end of December 2025, China's cumulative installed capacity of new energy storage technologies including lithium-ion reached 144. WEG secures funding for Brazilian battery manufacturing plant The new plant will increase WEG's. Houston/WASHINGTON, D. Energy Storage Monitor report released today by the American Clean Power Association (ACP) and Wood. The European Bank for Reconstruction and Development and PJSC Ukrhydroenergo signed a €75 million loan for hydropower modernization in Ukraine. The Bureau of Reclamation released proposals for managing Colorado River reservoirs amid stalled negotiations among seven states over water sharing.
