

The price of LG energy storage system in South Korea

Overview

Get the latest LG Energy Solution, Ltd. (KRX:373220) stock price with financials, statistics, dividends, charts and more. Less than a decade ago, South Korean companies held over half of the global energy storage system (ESS) market with the rushed promise of helping secure a more sustainable energy future. However, a string of ESS-related fires and a lack of infrastructure had dampened investments in this market. The project is initially planned to have a production capacity of 1 GWh, with future expansions to be made gradually based on market demand. In addition, LG Energy Solution will further strengthen its cooperation with domestic suppliers of LFP materials, components, and equipment in South Korea. HMC is set to buy Ohio battery plant building assets from LG Energy Solution for about \$2.81 USD Billion in 2025 to 19112.
