

The world s first solar power plant

Overview

In 1892, Frank Shuman was granted a patent for his invention of . Additional patents were issued relating to the process of making wire glass and machines for making wire glass. In 1914 Shuman invented a process for making laminated safety glass, called safety glass, and manufactured by the Safety Glass Company. In 1916 he patented a "Danger Signal" for railroad crossings, as well as the use of liquid oxygen or liquid air to propel a submarine.

The world's first solar power plant

How WW1 Killed a Dream of a Solar-Powered World

WW1 also marked the end of the world's first solar power station, which was operating only for one year, in Egypt, before the outbreak of hostilities caused it to be abandoned.

A Look At How The World's First Solar Power Plant Started In Egypt

In Egypt over a century ago, amid the then mostly rural Cairo suburb of Maadi, the world's first solar power plant was built in 1913. In a world of coal and hard manual labour, the sun ...

Frank Shuman: The Architect of the Sun

In 1910, a remarkable event disrupted the world of engineering when Frank Shuman built the first modern solar power plant. His ambitions led him to Egypt, where in 1913, he conducted a striking ...
