

Transport of generator sets for solar power plants in Italy

Overview

MOL Logistics offers specialised solutions: from just-in-time delivery to secure storage in climate-appropriate facilities. We ensure your equipment is handled with care, from selecting the right transport method to providing robust packaging and skilled handling. LOGISTICS SOLUTIONS FOR THE SOLAR POWER INDUSTRY Logistics management and advice for international transport of equipment to assemble and install solar power plants including solar panels, fixed solar structures, solar trackers, inverters and transformer substations. Get logistics and transport. Power generation projects, whether driven by fossil fuels, nuclear energy, or renewable resources like solar, wind, and hydropower, involve the transport of large, heavy, and often oversized equipment. This complicated process requires a highly specialized logistics partner. In this article, we. We take care of a wide range of equipment transportation for hydro, thermal, and nuclear power plants and substations, as well as for new-energy plants (biomass, solar thermal energy, snow-ice-cryogenic energy, geothermal power, wind power, solar power, etc). The lightweight, ecologically-friendly aluminium rail system guarantee, the 7,6% of gross generation, the 7% of electricity demand. By adhering to expert packing.

Transport of generator sets for solar power plants in Italy

Power Generation Freight Forwarders , OPCA

Explore logistics for power generation projects with OPCA. From turbines to solar panels, experts ensure safe, efficient global transport solutions.
