### Solar power in the United Kingdom

Overview  
Solar potential  
History  
Rooftop solar  
Large-scale solar farms  
Planning considerations  
Government programmes  
Future

Solar power has a growing role in electricity production in the United Kingdom, contributing around 5% of the UK's annual power generation in 2024. As of 2025, on sunny days, it provides over 30% of the UK's power consumption at times. There were few installations until 2010, when the UK government mandated subsidies in the form of a feed-in tariff (FIT), paid for by all electricity consumers. In the followin...
