

US Server Rack Fixed Type

Overview

Fixed rails are easily described as non-sliding rails or telescoping rails. They are designed to support servers, networking devices, and other data center equipment. These server rails are typically made of strong and robust materials like steel. Open-Frame Racks are a simple solution for mounting IT equipment in secure environments that don't require a lockable rack. They provide fast, easy access to equipment and cabling, and unobstructed airflow. To ensure broad compatibility across equipment.
