

Unconventional windmills

Higer conversion efficiency

CAN/RS485/WIFI/4G
Blue tooth communication

20 Kwh

30 Kwh

50 Kwh

Thick shell, well protection for inside cells

BMS customization supported

The advertisement features three stacks of white, rectangular battery units on wheels. Each stack is labeled with its capacity: 20 Kwh, 30 Kwh, and 50 Kwh. The units are arranged in a row, with the 20 Kwh unit on the left, the 30 Kwh unit in the middle, and the 50 Kwh unit on the right. The background shows a house and a clear sky. The text 'Higer conversion efficiency' is in the top left, and 'CAN/RS485/WIFI/4G Blue tooth communication' is in the top right. The bottom of the advertisement has two green boxes with text: 'Thick shell, well protection for inside cells' and 'BMS customization supported'.

Overview

Some unconventional designs have entered commercial use, while others have only been demonstrated or are only theoretical concepts. As of 2024, the most common type of wind turbine is the three-bladed upwind horizontal-axis wind turbine (HAWT), where the turbine rotor is at the front of the nacelle and facing the wind upstream of. We recognize outstanding achievements in engineering, innovation, and technology. Forget ordinary wind farms, these bizarre turbines are works of art. Wind energy has never looked weirder. China Daily/Enessere/Aeroleaf. Could the traditional three-blade wind turbine design soon become outdated?

Six imaginative designs are offering alternatives to the tried-and-true “windmill. As the quest for sustainable energy continues, innovative engineers and designers are pushing the boundaries of creativity and functionality to develop unconventional wind. Unconventional wind turbines are those that differ significantly from the most common types in use.

Unconventional windmills

Unconventional wind turbines explained

Some unconventional designs have entered commercial use, while others have only been demonstrated or are only theoretical concepts. Unconventional designs cover a wide gamut of ...
