

Uninterruptible power supply for indoor ont

Overview

If you're just looking to keep your internet on for a few hours, the easiest and most affordable option is a mini- UPS (Uninterruptible Power Supply). Think of it as a small, dedicated power bank designed specifically for low-power devices like your modem and router. Specifically designed to provide reliable, protected power to your ONT, the PB12B is the perfect low cost solution to complement to your FTTx deployment. Seamless Streaming & Long-Lasting Power Backup: Zero lag. Our customer needed a Router & ONT UPS to provide 1 hour backup for premises where their client was considered to be “vulnerable”. This is an OFCOM requirement is to allow Telecare services (such as alarm monitors and being able to make and receive calls) to be continued in the event of a power. Mylion: It can provide 0-second automatic switching of uninterrupted emergency power for the router/device during a power outage. Are there any user guides or online support?

Mylion: Yes, there will be instructions in each of our products, or we can also provide you with operation videos.
