

# Usp uninterruptible power supply weight

## Overview

---

Advanced circuit technology and the high speed IGBT switching technology eliminate the need for an inverter transformer, directly saves valuable installation space as well as reducing substantial weight of the system. This enables the compact light weight system for quick positioning. Add 50 lb. Contains on-board maintenance bypass. 400A Bus, 200A Neutral, (1) 350A MBP and (4) 110A MIS. Requires Industrial Relay and Display Card. for shipping weight of panels. DC-DC type small UPS mounts on a DIN rail to provide an ideal countermeasure for momentary power losses and power failures in industrial computers (IPC) and controllers. terminal for 1 minute at a leakage current of 10 mA max. Not a. 120 (265) Weight without batteries. Each battery module weighs 27 kg (60 lbs). The transfer time is fast enough that most devices will not experience a power drop when the UPS transitions to battery power. 3 Phase UPS power protection, solving today's energy challenges while setting the standard for quality and innovation with fully integrated solutions for enterprise-wide networks, data centers. sitive electronic equipment. Maintenance free, with a 10-year life span, uninterruptible power supply, and an automatic switchover.
