

Utility-scale solar iran

Overview

Iran is taking a significant step forward in renewable energy with an ambitious plan to develop 15GW of new solar capacity by 2030. This initiative, which centers on solar photovoltaic (PV) power stations, marks a major shift in the country's energy strategy. Iran's Vice-President Mohammad Mokhber. Recently, Jafar Mohammadi Nejad Sijaroudi, Deputy Director of Investment at Iran's Renewable Energy and Energy Efficiency Organization (SATBA), confirmed that the country has issued construction permits for nearly 100 GW of solar power projects. The milestone—highlighted by Energy Minister Abbas Aliabadi as a “major step forward”—comes. Iran has opened the first phase of its largest solar power plant as part of a massive government program to expand renewables capacity in the country. Tehran - ISNA - Iranian President Masoud Pezeshkian used a video link on Thursday to open a 120 megawatt (MW) unit of the Aftab Shargh solar farm in.
