

Waterproof Energy Storage Container for Oil Refineries

Overview

The Crude & HFO Storage Tank from TEC Container Solutions provides high-capacity, insulated static storage for crude oil, heavy fuel oils (HFO), and other high-viscosity products. Built with a double-walled, fully banded design, it ensures environmental protection while maintaining stable product. Petroleum is a fossil fuel that is extracted from underground reservoirs by drilling rigs and pumps, then shipped to refineries. Crude oil refining involves the separation of such impurities as sulfur, sand and other components. Current suppliers of bolted tanks can provide capacities up to 40,000 bbl or more depending on the storage. Hydrocarbon storage tanks are industrial containers designed to safely store products such as crude oil, gasoline, or diesel fuel. Unlike simple containment vessels, these atmospheric storage units are complex engineering systems designed to.

Waterproof Energy Storage Container for Oil Refineries

Crude Oil & HFO Storage Tanks , High-Temperature Containment

The Crude & HFO Storage Tank is specifically designed for the storage of heavy fuel oils (HFO), crude oil, and similarly viscous hydrocarbon products. Its reinforced insulation and heating options ensure ...
