

# Weather station uses photovoltaic folding container for communication

## Overview

---

A photovoltaic weather station, specifically designed for solar PV systems, is an intelligent monitoring solution that integrates high-precision sensors and IoT technology to collect, analyze, and transmit real-time environmental data. Our PV weather stations are the interface between weather sensors and the plant monitoring and deliver data to maximize the energy output. The portfolio offers certified and ready-to-use cabinets for PV power plants that meet the specific environmental, electrical and data transmission requirements. Huijue Group newly launched a folding photovoltaic container, the latest containerized solar power product, with dozens of folding solar panels, aimed at solar power generation, with a capacity for mobility to provide green energy all over the world. Unlike standard solar panel containers, LZY's mobile unit features a retractable solar panel.
