

What are the brackets for solar panels made of

Overview

These brackets are typically made of aluminum or steel and are designed to withstand the weight of the solar panels, wind, and other weather conditions. A solar mounting bracket —often called solar racking or a mounting system—is the engineered backbone of any photovoltaic (PV) installation. This kit accommodates various sizes and supports mounting up to four solar panels side by side. The solar panels cannot maintain steady performance and stay safe without brackets. Overview of Types of Solar Panel Mounts.
