

# What happens when there is no wind

## What happens when there is no wind

---

### **ELI5: What would happen if the wind stopped blowing?**

If natural wind stopped entirely, the Earth's weather patterns would be severely messed up. These are some of the things that would change: It would rarely rain in inland locations (wind moves moist air ...

---

## What Would Happen If There Was No Wind?

Discover the critical role of wind. Without atmospheric movement, planetary systems would fail, causing extreme heat, drought, and lethal pollution buildup.

[Learn More](#)

---

## What would happen if there was no wind?

Without wind systems warm, moist air won't move around. Water might still evaporate but it won't travel meaning anywhere away from a large body of water will dry up.
