

# What is the cost price of solar inverter

## Overview

---

A solar inverter makes up about 10% of the total cost of your solar energy system. The size of your system, the type of inverter, and the efficiency rating affect your final cost. String inverter systems cost less up front, but systems using microinverters last. How much does an inverter cost for solar panels?

Most homeowners pay \$1,500–\$4,500 installed, including equipment and labour. Costs range from \$1,000–\$4,000 depending on type, size, and features. Yet, prices fluctuate drastically, and picking the wrong type, size, or brand can lead to wasted. This type is cost-effective and easy to set up, especially in areas with consistent sunlight. While string inverters generally come with warranties ranging.
