

What is the return rate of photovoltaic panels

Overview

The return on investment of a solar panel installation depends on its location, performance, efficiency and size, but 10% is average. You can maximize your solar panel ROI by taking advantage of rebates and other incentives and participating in net metering through your local. Installing solar panels is a long-term investment that can pay for itself through utility bill savings. The actual solar panel return on investment (ROI) time depends on several factors, including the cost of panels installed and average monthly savings, which can be maximized with leading.
