

# What is the size of a 695W photovoltaic panel

## Overview

---

Standard residential solar panels are typically around 5.5 feet wide and weigh between 40 to 50 pounds. However, the exact dimensions depend heavily on the panel's technology, wattage, and the manufacturer's design. But what is the wattage?

That is unfortunately not listed at all. 72-cell solar panel. Standard Residential Panels Optimize Space and Handling: The industry-standard 60-cell panel dimensions (65" × 39" × 1.5") aren't arbitrary - they represent the optimal balance between power output, installation ease, and roof space utilization. the customer service was top-notch, guiding me through the selection process. their support was invaluable, and. Canadian Solar's N-type TOPCon 695W Bifacial Panel is engineered for utility-scale performance, delivering exceptional efficiency, durability, and energy yield. Featuring cutting-edge N-type Tunnel Oxide Passivated Contact (TOPCon) cell technology, this module offers industry-leading bifacial gains. Product is no longer manufactured. 4%, making it one of the most.
