

What is the unit price for installing photovoltaic panels

Overview

Solar panel installation cost averages \$27,181 for a standard home, with most homeowners spending between \$18,351 and \$36,409. Prices vary based on system size, panel type, and installation complexity. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in. As of 2026, the average cost of residential solar panels in the U. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2. 50 per watt of installed capacity (more on price per watt below). NLR's PV cost benchmarking work uses a bottom-up. Solar panels cost about \$30,500 on average—but often pay for themselves several times over through 25-30 years of electricity savings. In 2025, the costs for solar panels continue to trend downward due to technological advances.
